OptraPol®

Efficient polishing of composite restorations

Innovative solution for efficient composite polishing

OptraPol® is an advanced one-step polishing system filled with micro-fine diamond crystals (filler content: up to 72 wt. %). Effective results are visible within seconds. OptraPol makes highly esthetic composite restorations shine with a beautiful natural lustre. Restorations are smoothed to a high gloss in a single step.

High quality

- Radiant high-gloss restoration surfaces
- High diamond content for excellent results

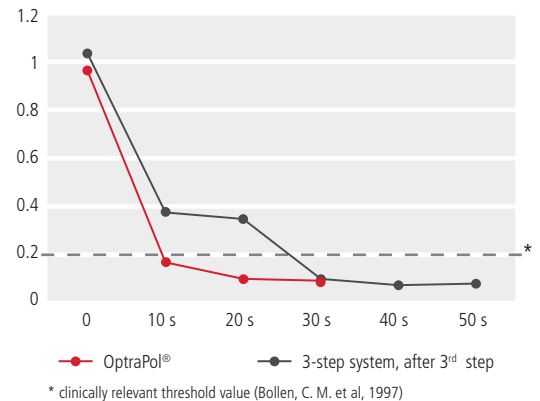

High efficiency

- High gloss after a short time and in only one step
- No need for changing tips
- 4 shapes for different treatment areas
- Also suitable for polishing amalgam

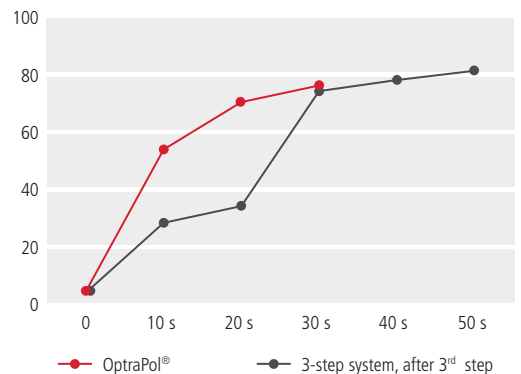

Long-lasting and economical

- High dimensional stability
- High abrasion resistance
- Autoclavable and reusable
- Economical

Surface roughness (µm)

Surface gloss (gloss units)

Source: *In vitro* test of competitive polishing systems; composite: Tetric EvoCeram® (Dr S. Heintze, Ivoclar Vivadent, Schaan, 2009)

Bollen, C. M., Lambrechts, P. & Quirynen, M. (1997). Comparison of surface roughness of oral hard materials to the threshold surface roughness for bacterial plaque retention: a review of the literature. *Dent Mater*, 13(4), 258-269.

This product forms part of the "Direct Restoratives" product category. Products from this category are optimally coordinated with each other.

Delivery forms:

Assortment

Small flame (6 x)
Large flame (4 x)
Cup (4 x)
Lens (4 x)

Refills

Each shape is available separately in packages of 10.
